

VOLUNTARY REMEDIATION PROGRAM DEPARTMENT OF ENVIRONMENTAL MANAGEMENT

PROJECT SUMMARY

Site Name:	Nora Plaza Service Center
Applicant's Name:	Bridgestone/Firestone, Inc.
Site Location:	1300 East 86th Street Indianapolis Marion County
VRP Site Number:	6980505
Project Manager:	Bill Wieringa
Date Application Received:	May, 1998
Date Project Completed:	August, 1999
Project Duration:	1 years, 3 months
Contaminant Group(s):	Volatile Organic Compounds (VOCs), Semi-Volatile Organic Compounds (SVOCs), Metals
Media Cleaned Up:	Surface Soil, Subsurface Soil, Groundwater
Cleanup Goals Achieved:	Tier II Residential
Deed/Land Use Restrictions:	Not Applicable

Project Description: The site wanted to address former underground storage tank (UST) and former underground hydraulic lift areas. The former waste oil UST was removed in April of 1996, and the underground hydraulic lifts were removed over a six-month period in 1997. Upon removal of the UST and lifts, visibly impacted soils were removed before backfilling the excavations.

The site installed four monitoring wells which were sampled over four consecutive quarters for VOCs, SVOCs, and metals. During the sampling of the wells, no constituents of concern were found above the Tier II Residential cleanup levels.

The site also performed confirmation soil sampling around the site property. Four samples were collected from the former UST area, samples were taken from each of the ten former lift areas, and samples from the bulk storage and used battery storage areas were also collected. All confirmation soil samples taken by the site's consultant and split with IDEM personnel were confirmed by laboratory results to be under the Tier II Residential Clean-Up Goals for VOCs, SVOCs, and metals. No further

action is required for this site.
